

TABLE OF CONTENTS

INTRODUCTION.....	4
IMPORTANT GASTROINTESTINAL NEMATODE PARASITES	4
<i>Haemonchus contortus</i>	4
<i>Teladorsagia circumcincta</i>	6
<i>Trichostrongylus axei</i>	6
<i>Trichostrongylus colubriformis</i> and <i>T. vitrinus</i>	7
<i>Nematodirus battus</i> , <i>N. filicollis</i> and <i>N. spathiger</i>	8
The Typical Life Cycle of a Gastrointestinal Nematode Parasite	9
EPIDEMIOLOGY OF GASTROINTESTINAL NEMATODE PARASITES	10
Normal Patterns of Infection in Adults and Young-stock.....	10
Hypobiosis or Arrested Larval Development.....	11
Immunity and Parasite Burden	11
Normal Patterns of Infectivity on the Pasture	12
DIAGNOSING GASTROINTESTINAL PARASITISM.....	15
Fecal Egg Counts (FEC)	15
Clinical Changes in the Animal.....	17
Post Mortem Examination and Worm Counts.....	18
ANTHELMINTIC DRUGS FOR SHEEP and goats	19
Benzimidazoles (BZ).....	19
Imidazothiazoles (LV) and Tetrahydropyrimidines	19
Macrocyclic Lactones (ML)	20
Amino-Acetonitrile Derivatives (AAD).....	20
Narrow-Spectrum Drugs	20
Route of Administration.....	20
Appropriate dose of an anthelmintic	21
Efficacy Against.....	21
WHY TREATMENT FAILURE MAY OCCUR.....	22

Use of the Wrong Anthelmintic.....	22
Failure to Administer an Anthelmintic Properly.....	22
Reinfection After Treatment – Apparent Treatment Failure	23
ANTHELMINTIC RESISTANCE (AR).....	24
Definition of aR.....	24
How does AR Develop?	24
Detecting the Presence of AR in a Sheep Flock.....	28
SUSTAINABLE INTEGRATED PARASITE MANAGEMENT (sIPM)	30
Goal	30
★ 1. Manage the level of pasture contamination.....	30
★ 2. Use Anthelmintics Appropriately	34
★ 3. Monitor and Treat Animals Selectively	34
★ 4. Quarantine and Treat New Introductions.....	41
★ 5: Investigate Treatment Failure.....	42
Parasite Control on Organic Sheep Farms	43
OTHER IMPORTANT NEMATODE PARASITES	44
Small Intestine	44
<i>Cooperia curiticae</i>	44
<i>Bunostomum trigonocephalum</i>	44
<i>Strongyloides papillosus</i>	44
Large Intestine	45
<i>Chabertia ovina</i>	45
<i>Oesophagostomum columbianum</i>	45
<i>Trichuris ovis</i>	45
Lung	46
<i>Dictyocaulus filaria</i>	46
<i>Muellerius capillaris</i>	46
Nervous System	46

<i>Parelaphostrongylus tenuis</i>	46
NON-NEMATODE INTERNAL PARASITES.....	47
Protozoa	47
<i>Cryptosporidium parvum</i>	47
Coccidiosis Caused By <i>Eimeria</i> Species	47
Tapeworms (Cestodes)	47
<i>Moniezia expansa</i>	47
Liver Flukes (Trematodes).....	48
<i>Fasciola hepatica</i>	48
<i>Fascioloides magna</i>	49
<i>Dicrocoelium dendriticum</i>	49
CONTROL OF COCCIDIOSIS IN LAMBS AND KIDS	50
Coccidiosis – The Disease.....	51
Diagnosing Coccidiosis.....	52
Factors Affecting if Coccidiosis is a Problem in the Herd or flock	52
Controlling the Enemy	53
CONTROL OF THE INTERMEDIATE STAGE OF DOG TAPEWORMS	59
GLOSSARY OF ABBREVIATIONS.....	61
REFERENCES AND RECOMMENDED READING.....	62
APPENDICES.....	64
1. Protocol for Collecting Faecal Samples for Faecal Egg Counts	64
2. McMaster Counting Technique.....	65
3. Records for Pasture Use and Parasite Control	66
4. Records for Fecal Egg Count Monitoring.....	67
