Phone	Fax	Cell	Email	
Receiver flock location if different from above				Date of Last Flock Test:
Address		Town	Prov	

Submitting Information		
I certify that the above listed sheep came from an official Maedi Visna Status _____ (<i>insert current status</i>) flock and will not be exposed to lower or unknown status sheep or goats en route to the Receiver Flock.		
Vendor (Print Name)	Date Animals to be Transferred: (must be within 30 days of submitting form)	Date:
Vendor (Signature)		Telephone
Transfer Form copy to Receiver	Transfer Form copy to program administrator	Retained copy for vendor for audit

Instructions to vendor and receiver

- This form can only be used if the vendor(s) flock is in good standing.
- The original of this form must accompany the sheep and goats being transferred.
- The second copy must be mailed to the OMVFSP coordinator (c/o Ontario Sheep Farmers 130 Malcolm Rd Guelph, ON N1K 1B1)
- The third copy must be retained by the vendor and be available for auditor purposes for five years.
- All sheep transferred must have a CSIP or ATQ (Quebec) tag. Goats should be identified using the Canadian Voluntary Goat Identification Program. If not, identification must be unique in the flock origin either as a tag or tattoo.
- While en route to the receiver's flock, at no time must the animals come in contact with sheep or goats of lower or unknown status.
- The vehicle used to transport the animals must be free of used bedding or feed used by any species of ruminants as well as any manure produced by a ruminant. If the vehicle has been used to transport sheep or goats of unknown or lower status within the past seven (7) days, it must be cleaned of all organic debris and then thoroughly washed with clean water with a suitable disinfectant prior to loading.
- Failure to comply with these recommendations could result in loss of status in the receiving flock.
- Animals from A Status flocks or flocks of identical status must have one (1) negative test while in an approved isolation facility and prior to entering a OMVFSP flock.
- Once the animals enter the receiving flock, the status of the animals will be the same as the receiver's flock. i.e. Monitored-Low Risk, Enrolled, B, or A.
- If the receiver's flock has a higher status than the vendor's flock: All animals must have two (2) negative MV tests 8 to 12 weeks apart, while in an isolation facility. Otherwise, upon receipt of the animals, the status of the receiving flock will decrease to that of the vendor flock.
